
Adobe Color Cc Offline

The color wheel (or the image in the Extract Theme tab) can be used to create a color palette that can be saved to Creative Cloud after you sign in. This tool lets you add multiple colors from the Color Palette to the Color Palette, or create a new Color Palette

with other colors from your brush library, gradient palette, or colors. To create a multicolor color palette, you first need to create a new file and enter the required colors in the Color Picker dialog box. To add a single color to the color palette, select Add in the Colors area of the Extract Theme tab and click Add.
