UNLOCKED.rar Kontakt 6 v7.8.1 UNLOCKED.rarQ: Converting a list into a
string[] I'm trying to convert a list into a string array. I've tried the
following, but it has a conversion problem. How to convert a list into
string array using.ToArray()? List list = new List(); string[] strArray =
list.ToArray(); How can I convert a list to an array of strings, without
losing the list functionality? A: Just add String.Join after ToArray: string[]
strArray = list.ToArray().String.Join(","); A: This should do what you
want: List list = new List(); var stringArray = list.ConvertAll(s =>
s.ToString()); A: In C# 3.0 you can do this var list = new List { "a", "b",
"c" }; var stringArray = (string[])list.ToArray(); //stringArray = { "a", "b",
"c" } So you can use the extension method as well: var stringArray =
list.Select(item => item.ToString()).ToArray(); Or if you prefer LINQ you
can also do this: var stringArray = list.ToArray().Select(item =>
item.ToString()).ToArray(); Reference: LINQ Extension Methods Part 1:
Projections Housing allocations in Norway have become a hotly debated
topic since the government decided to freeze allotments in 2016. Some
argue that this is a matter of fairness, since every citizen is entitled to
housing, regardless of their income. Many others argue that allotments
are not the right way to house citizens and that abolishing them will
lead to social unrest. After an initial investigation conducted in May
2018,
