-Delete all the junk files on your PC! -Registry cleaning and defragmenting: the HDD is much faster and the PC runs smoother. -Secure the privacy of your PC! -The memory optimizer frees up your RAM! -Security application, wipes PC history! -Data recovery! -System performance boost, files shredder! -Folder hiding, PC privacy! -Integrated program uninstaller: program uninstaller and PC Uninstaller in one! Portable SysInfo Portable Free Pro is a handy application that is used to collect and store information about the computer that has been running on it, as well as the registry of Windows settings. The software is a cross between a memory scanner and a system scan tool. It helps you find and remove duplicates, temporarily stored files and restore useful information about your system, such as disk sectors, CPU usage, memory settings and more. The app can also find and remove unused files and folders, as well as terminate multiple processes. However, a full system scan is only available as a paid upgrade. The program is very simple to use. In fact, it has an easy-to-understand user interface that consists of two windows. The first one is used to display the collected information and, the second one is used to capture the

necessary system info. There are two major tabs to work with: the system tab and the informations tab. The system tab will show you information about your hard drive, system memory, processor speed and a few more things. The informations tab will allow you to view the various information about the system, such as the release of Windows, the version of installed applications, the screen resolution and the computer's fingerprint. As mentioned, the main feature of the program is the ability to quickly find and retrieve useful information about the system and, in particular, the registry. There are two ways to accomplish this. You can tap the buttons and the list will be populated with different system and information selections. Or you can use the search box, which will allow you to retrieve any information that you may want. With the help of this software, you will be able to find duplicates, temporary files and other files that are just wasting space on the computer. The app can also help you to easily back up your existing installation, restore it as well as wipe your entire Windows registry. On the next stage you can choose to compress the file or move it to your desktop. To avoid any problems, it is best to compress the downloaded file to a location that is not meant to accept any files that are larger than 100 MB. It is critical to verify the file before downloading it. Be sure to first scan the downloader for spyware and other malicious programs and try to avoid downloading viruses. Download now.E.2d at 648. In the instant case, the General Sessions Court had previously entered a deferred sentence. Defendant's challenges to this form of diversion are without merit. Defendant was not resentenced by the state's statute nor did the defendant plead guilty and thereafter receive a new sentence. See also, *State v. Hightower*, 778 S.W.2d 137 (Tenn. 1989). II The defendant complains of the introduction into evidence of a transcript of the proceedings in which defendant was sentenced in the General Sessions Court after his guilty plea. The defendant complains that the State could not allege that the tape was a "true transcript" without introducing the tape itself. The defendant argues that the use of the tape was prejudicial because the tape was not certified, given as evidence or played for the jury. While the record is unclear as to whether the transcript was introduced or even offered into evidence, there is no objection to the tape by the defendant. The transcript was not offered as a separate exhibit. We have carefully examined the record, including the transcript of the testimony, the hearing, and the judgment, and find no error. The judgment is affirmed. JONES and GIBBONS, JJ., concur.
