It is a fun game similar to the Xbox Live Arcade gameÂ . the sizes and designs, even the prices, are all varied. Therefore, it would be especially advantageous if packaging units could be produced in an efficient manner, by which packages with preferred geometry and strength could be obtained in a controlled manner, for the purpose of developing such packages with desired aesthetic appeal. It would be further advantageous to provide a packaging unit which would enable the packages thereof to be produced with cost control and ease, with means to protect the relatively fragile contents of the containers, with a package which is aesthetically attractive, with relatively easy assembly, and without specific projections which might mar the package. The present invention provides a number of novel and unique container components which contribute to an efficient and effective packaging system which can produce an attractive package or container. The components and their advantages are described herein, as are certain features of the packaging system of the present invention./* * Copyright (C) c6a93da74d
