alright, i think that should do it. enjoy the massive list below! if you would like to help support my work, you can become a patron on patreon, or learn more on my patreon post. feel free to email me if you have any questions, i enjoy talking about things like this. since i am talking about dungeons & dragons, i should also introduce what this is all about. dungeons & dragons (d&d) is the brainchild of game designer gary gygax and is one of the most successful rpg's of all time. the system is also famous for spawning some of the best computer games of all time including baldur's gate, the bard's tale, and icewind dale. in a dungeons & dragons campaign, you play a character who travels to a fantasy world to slay monsters and other evil creatures. this might mean you fight a group of orcs or maybe you are the hero that slays the evil lich king and becomes a new kind of hero. either way you have a fun time and some awesome creatures to fight in most of these campaigns. dungeons & dragons is a mostly open format rpg system that requires little to no rules. it is focused more on the social aspects of role playing games like social skills, teamwork, and other fun stuff. the core system has many optional rules that tend to complicate things quite a bit. the third edition of dungeons & dragons was released in 2000 and this version was good but still had a lot of things to tweak. the fourth edition of d&d was released in 2008 and was a huge success and the official best selling game of all time. the fifth edition of dungeons & dragons should be released this year.

the shotaxmonsters subreddit is something that you will love to visit if you are interested in rpgs. there are not that many people on there, but there are probably more than in this article alone. it is a place where you can find updates on the game, help other people who are facing issues in the game, or even just ask for help on how you could look up the code for a specific character's kusari-gama. it has a lot to offer, and it is a great place to get help and a great place to go and hang out. if you are a fan of the series, this would be a good community to jump into. the last aspect of the game

that i want to look at is the battle system. there are three types of enemies in this game. the first are the normal enemies which can only be fought one at a time. the second type of enemy are the mecha types that have a lot of hp. the third and final enemy type are the gundam types which have the ability to destroy you if you are within proximity to them. all of these enemies have a stamina gauge that starts at 8 and recharges every few battles. when you fill the gauge up, you can use your special attack. some of the special attacks can be used once per battle, and some can be used multiple times. the enemies also have a shield gauge that fills up to protect them from a few special moves or spell attacks. mind blowing.. note: monster girl quest 9 was not released by monster girl quest, but the case was listed here. anyone who has not read that explanation will not understand what happens in this chapter of monster girl quest. another thing i did was make a video detailing how publishing is actually being run by valve. i broke down a bunch of numbers to show that what weve been told is simply not true, and publishing is actually being executed in an entirely different manner than we have been lead to believe. 5ec8ef588b
