What's New In?

John's Base64 Encoder / Decoder is a simple-to-use application that enables you to encode and decode text using Base64. It features basic options that can be tackled even by users with no previous experience in such software. No setup required, besides .NET Framework. As long as you have .NET Framework installed, you don't need to set up anything else. This means that

you can save the downloaded.exe file in any part of the disk and just double-click it to run the program on any PC. It doesn't make any changes to the Windows registry, unlike many installers. Simple GUI for encoding and decoding text

When it comes to the interface, John's Base64 Encoder / Decoder adopts a standard window with a minimalistic look and stripped off graphical elements, which lets you type or paste text from the Clipboard, as well as click a button to instantly encode or decode it. The new text is shown on the bottom part of the screen and can be selected to copy it to the Clipboard by opening the right-click menu or by triggering the global hotkey. There are no other notable options provided by this application. For instance, it doesn't integrate buttons for printing text or for exporting it to file.

Evaluation and conclusion As expected from such a small-sized tool, it didn't put a strain on the overall performance of the machine

in our tests, thanks to the fact that it needed low CPU and RAM to work properly. No error dialogs popped up and it didn't hang or crash. Conversions were carried out swiftly. All in all, John's Base64 Encoder / Decoder offers a fast and effective solution for encoding and decoding using the Base64 algorithm, and it can be seamlessly handled by students or other kinds of users.

However, it doesn't have richer options.

Best in class strategy: this is an advanced version of the most popular strategy game, with many more possibilities and enhanced graphics.

Best in class artificial intelligence: enjoy the experience of the powerful but wise personality of Max, who is able to learn from his mistakes and who improves his ability to plan and react to the

opponents' moves. Best in class music: play an original soundtrack and discover the fine art of music, thanks to great arrangements by the world's most renowned musicians. Best in class

physics: play with gravity! Combine gravity with the laws of momentum and friction and discover the infinite possibilities that this combination offers. Best in class graphics: play with a giant number of colorful and funny animals! Investigate their incredible abilities and try to guess which ones you will be able to bring to life. Best in class online play: compete in different tournaments and games, winning valuable rewards to enhance your favorite characters. The new game by Gameforge is a personal challenge with outstanding graphics. Do you have what it takes to be the best?

System Requirements:

*Minimum specifications: OS: Windows XP, Vista, or Windows 7 64-bit CPU: Intel Core 2 Duo 2.26Ghz RAM: 1GB RAM Hard Drive: 16GB Graphics: DirectX 9-compatible Input: Two joysticks, One Keyboard & Mouse Display: 1280×1024 screen resolution Other: The entire game engine is dependent on the DirectX 9 API. It will not work on earlier versions of Windows. The installation is well documented and no additional files need to be installed. *
